Forecast For Northwest England
Issued by Met Office Exeter
at 0400 on Wednesday 27 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
A largely dry but cloudy day. Feeling less cold.

Today:
A largely dry but cloudy day, with any lingering morning rainfall quickly clearing eastwards. A few bright or sunny spells are possible, especially late in the day. Feeling less cold, with light winds that begin to strengthen later. Maximum temperature 8 deg C (46 deg F).

Tonight:
A dry evening, before a band of heavy rain, turning wintry over higher ground, moves over the region from the south west overnight. Windy, and feeling cold. Minimum temperature 2 deg C (36 deg F).

Thursday:
A rainy day, with heavy rain and hill snow lingering across the region. Rain slowly clears northeastwards as the day goes on. Breezy and cold, but milder in the south. Maximum temperature 10 deg C (50 deg F).

Outlook for Friday to Sunday:
Rain on Friday, wintry at times, becoming drier later. Sunny and dry Saturday and early Sunday, with overnight frosts. Rain and a risk of snow arriving late Sunday. Cold throughout.
